## Triangle Similarity Workshee

## Name:

$\qquad$

1. What is the length of $\overline{T X}$ ? Show or explain how you got your answer.

Date: $\qquad$
2. Triangle $A C D$ shown below is similar to triangle $A B E$.

- the measure of $\overline{E B}=6$ units
- the measure of $\overline{D C}=8$ units
- the measure of $\overline{A D}=12$ units

What is the measure of $\overline{A E}$ ?
3. Look at the figure below.

Note: The figure is not drawn to scale. What is the value of $x$ ?
4. Look at this diagram.

In this diagram, $\overline{P Q}$ is parallel to $\overline{S T}$. What is the length, in centimeters, of $\overline{R T}$ ?

## Porch Roof

Julius is adding a porch roof to his house. The porch roof will extend 10.0 feet from his house and have a
slant length of 12.0 feet. Julius plans to add support beams 8.0 feet from the end of the slanted length of the roof

How long, in feet, will each support beam need to be? Round your answer to the nearest tenth of a foot
6. A swimmer needs to know the width of a river without having to cross it. She made the diagram below.

Note: The figure is not drawn to scale. What is the width ( $w$ ), in meters, of the river?

In her geometry class, Karen constructed In her geometry class, Karen constructed
the figure above in which $\overleftrightarrow{A B}$ is parallel
to $\overparen{E D}$ and $\angle A \cong \angle E$. The two triangles in the figure are similar.
a) Name the two similar triangles (with vertices in correct order).
b) Explain why the two triangles are similar.
c) What is the measure of $y$ ? Show your procedure.
8. Each morning at camp, Cindy and Josie swam across a pond. To determine the distance they swam, they placed rocks along straight lines at positions indicated by $A, B, C, D$, and $E$ on the sketch below. created at $A$ and $E$ were right angles.

a) What is the ratio of the longer given distance to the shorter given distance in triangle BED?
b) Are triangles $B A C$ and $B E D$ similar? Explain your reasoning.
c) Write a proportion that can be used to find $d$, the distance across the pond.
d) What is $d$, the distance across the pond? Be sure to show your work.
9.

10.

In the figure above, the two triangles are similar. What is the value of $x$ ?

Answer: $\qquad$ -
11. A billboard at ground level has a suppor length of 26 feet that extends from the top of the billboard to the ground. A post that is 5 feet tall is attached to the base of the support is attached to the ground. In the figure shown, the distance, in feet, from the base of the billboard to the base of the support is labeled $x$.

Create an equation that can be used to
Create an equation that can be used to
determine $x$. Discuss any assumptions determine $x$. Discuss any assumptions
that should be made concerning the equation. Use your equation to find the value of $x$. Show your work or explain your answer.
12. In the accompanying figure, $\overline{D E} \| \overline{B C}$, $A D=10, A B=24$, and $A C=36$. Find $A E$.
